

NUWEIGH CHARGER

HM200PW

The height of person plays an important role in treatment, especially Body Mass Index (BMI). BMI is a calculated value which allows you to define how well the mass of the human body corresponds to the height and consequently a degree of over or under weight.

Using BMI you can try to estimate the risk of developing an illness due to excess or low weight. Easy to assemble and simple to use HM200PW makes measuring height an easy routine job.
